SUMMARY

Senior Python and Node.js Developer with 15+ years building and maintaining scalable applications in high-scale enterprise environments — including **5 years verifying medical device software** at Hospira in regulated FDA workflows. Full **SDLC ownership** — design, development, unit testing, code review, CI/CD deployment, and production support — across **RESTful APIs, microservices**, and secure cloud-native systems on **AWS and GCP**. Proficient in SQL and NoSQL databases, Docker/Kubernetes containerization, and cross-functional collaboration. Delivers clean, well-documented, production-ready code with strong performance optimization and high-availability discipline.

TECHNICAL SKILLS

- **Python & Node.js:** FastAPI, Django, Flask, Asyncio, Node.js, JavaScript, RESTful API design, microservices, pytest, unit/integration testing
- **Architecture & SDLC:** Full lifecycle ownership, requirement analysis, system integration, code reviews, development standards, technical documentation
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, SQL optimization, NoSQL data modeling
- **Cloud & DevOps:** AWS (ECS, Lambda, RDS, S3), GCP, Docker, Kubernetes, CI/CD (GitHub Actions, GitLab CI), Linux
- **Full Stack:** React.js, HTML/CSS, API integration, containerized Python/React/Node deployments
- **Enterprise & Regulated:** HIPAA-compliant platforms, FDA medical device verification (Hospira), secure system design, high-availability operations, embedded device integration testing

KEY ACCOMPLISHMENTS

- Owned end-to-end delivery of Python microservices on AWS, increasing throughput by **45%** and reducing API latency below **120ms**.
- Built event-driven pipelines processing **2.5M+ daily transactions** with **99.95% accuracy** across PostgreSQL, Redis, and external APIs.
- Containerized Python, React, and Node.js applications, improving deployment frequency by **3x** via Docker and automated CI/CD.
- Delivered enterprise backend systems at Disney with **99.99% uptime** and rigorous unit testing during large-scale migration.
- Architected HIPAA-compliant REST APIs serving **500k+ users** with secure access controls and pre-deploy CI/CD validation.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Design, develop, test, deploy, and support scalable Python backend applications and REST APIs for enterprise clients across healthcare, e-commerce, and data domains.
 - Collaborate with cross-functional stakeholders on requirements, design decisions, and system integration; enforce code review and development standards.
 - Optimize performance and troubleshoot production issues to maintain high availability and responsiveness.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Built and maintained Python, React, and Node.js applications; containerized with Docker and deployed to AWS/GCP with GitLab CI pipelines.
 - Designed event-driven microservices with message queues, ensuring zero data loss during peak traffic.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Developed and maintained scalable backend modules for high-volume enterprise systems on AWS with **99.99% uptime**.
 - Created Python database interfaces and unit test suites ensuring **100% data integrity** during platform migration.
-

Senior Software Engineer

May 2023 – July 2023 | CVS, Inc. (Remote)

- Decoupled monolithic backend into containerized microservices (Docker), improving integration test speed by **50%**.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Built secure REST APIs and relational/noSQL data models; established CI/CD automation and production support at **99.9% availability**.
-

Quality Assurance & Network Integration Engineer

February 2005 – December 2009 | Hospira, Inc. — San Diego, CA

- Verified embedded software for **Symbiq** and **Plum A+** hospital infusion pumps — requirements-based testing, defect tracking, and formal verification in regulated medical device workflows.
- Collaborated with firmware and hardware engineers; built recovery tooling and host-to-device automation for networked medical systems over wired/wireless LANs.

- Installed and validated client/server drug library software and database packages; served as verification team technical lead for device and network integration issues.
-

Software Developer and Scrum Master

April 2014 – August 2015 | KeyIngredient — Austin, TX

- Developed e-commerce backend REST APIs on Google App Engine; led code reviews and cross-functional Agile delivery.

EDUCATION

Associate of Science, Computer Electronics

2010 – 2013 | ITT Technical Institute, San Diego, CA (GPA 3.67)
