Senior Backend Engineer | Cloud & Data
Systems

6355 Oak Avenue Apt 18
Temple City, CA 91780

Summary

Senior/Staff Backend Engineer with over 15 years of experience architecting and deploying scalable, high-throughput software infrastructure and data systems using **Python (Django, FastAPI, Flask)**, **PostgreSQL**, and **AWS (Lambda, RDS, S3)**. Proven track record of transforming complex product requirements into fault-tolerant backend architectures, optimizing relational database queries, and automating data integration pipelines handling millions of daily events. Strong problem solver with an entrepreneurial mindset, adept at collaborating cross-functionally across Agile teams to drive platform reliability, test coverage, and product delivery.

Skills

- **Languages & Frameworks:**
Python 3, Django, FastAPI, Flask, Asyncio, SQL, Bash
- **Cloud & Infrastructure:** AWS (Lambda, RDS, S3, ECS, Fargate), Docker, CircleCI, CI/CD
- **Databases & Storage:**
PostgreSQL, MySQL, Redis, Database Schema Design, Query Optimization
- **Architecture & Methodologies:**
Microservices, Distributed Systems, Event-Driven Architecture, REST APIs, System Testing & Integration, Agile/Scrum

Experience

Solutions Architect & Lead Backend Consultant

2021 to Present

CGJSoftware — Los Angeles, CA

Entrepreneurial Consulting & Engineering Leadership

- Architected and deployed distributed Python microservices and data processing pipelines across AWS (Lambda, S3, RDS), serving high-concurrency client workloads with 99.95% uptime.
- Engineered custom Django and RESTful API backend applications integrated with PostgreSQL databases, applying strict schema validation and query optimization.
- Collaborated directly with product managers and stakeholders to translate business needs into scalable technical specifications and low-defect code.
- Implemented automated CI/CD workflows and unit/integration testing suites (PyTest) to accelerate deployment cadence while reducing production regression bugs.

Senior Backend / Software Engineer

2017 to 2021

Enterprise Data & Platform Systems

Core Backend & Data Pipeline Architecture

- Designed and maintained event-driven ingestion systems handling over 2.5M daily transaction events, utilizing Python, AWS RDS, and PostgreSQL.
- Built robust asynchronous workers and API endpoints for real-time visibility, automated audit workflows, and cross-system data synchronization.
- Extensively performed unit testing, regression testing, and system benchmarking to guarantee database consistency and fast query execution speeds.
- Mentored junior engineers and partnered with cross-functional Agile teams to optimize code delivery cycles and system maintainability.

Education & Certifications

Associate of Science : Computer Electronics

2010 to 2013

ITT Technical Institute — San Diego, CA

Certificates & Military Service

- Associate of Science Degree in Computer and Electronics Engineering Technology (GPA: 3.67)
- U.S. Marine Corps Honorably Discharged Veteran
