SUMMARY

Scrum Master cum Quality Engineering Lead with over 15 years of experience in Agile delivery, quality engineering, and software testing. Expert in facilitating Scrum ceremonies, leading cross-functional teams, and implementing test automation frameworks. Proven track record in enhancing software quality and delivery predictability through CI/CD integration and comprehensive testing strategies.

CORE COMPETENCIES

Agile & Scrum Leadership: Scrum ceremonies, team coordination, Agile methodologies, stakeholder management

Quality Engineering & Testing: Test strategy development, test automation, CI/CD integration, defect management

Tools & Technologies: Selenium, Cypress, Postman, Jenkins, GitHub Actions, Jira, SQL

Cross-Functional Collaboration: Product Owners, DevOps, developers, business stakeholders

KEY IMPACT

- Facilitated Agile delivery and quality assurance for multiple software projects, improving delivery timelines and quality metrics.
- Implemented test automation frameworks that increased test coverage by **30%** and reduced manual testing effort by **40%**.
- Led defect management and root-cause analysis initiatives, enhancing product reliability and reducing defect rates by **25%**.
- Successfully integrated automated tests into CI/CD pipelines, accelerating release cycles and ensuring high software quality.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Operated corporate entity (CGJSoftware, Inc.) facilitating high-level B2B engineering contracts, advisory services, and cloud modernization for enterprise partners across healthcare, e-commerce, and data domains.
- Architected and deployed containerized Python microservices (FastAPI, Django, Sanic) on AWS (ECS, Fargate) and Docker, increasing system throughput by **45%** and reducing API latency to under **120ms**.
- Integrated LLMs and vector search capabilities (OpenAI API, LangChain) into client data pipelines, automating document classification and cutting manual data entry time by **60%**.
- Pioneered AI-augmented development practices across client teams using Cursor, Claude, and GitHub Copilot, slashing bug fix resolution times by **40%** and streamlining PR code review cycles.
- Delivered targeted legacy maintenance, cross-border software compliance reviews, and international cloud architecture strategies for remote enterprise clients.

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure Python backend REST APIs for HIPAA-compliant healthcare platforms, servicing over **500k active user profiles**.
- Managed a cross-functional offshore development team as Scrum Master, conducting PR reviews and establishing automated CI/CD pre-deploy scripts to eliminate code conflicts.
- Configured production Linux Ubuntu environments, domain DNS (TXT, CNAME, MX), SSL/TLS security, and automated crontab backup procedures with **99.9% system availability**.
- Authored comprehensive Git branching/rebasing documentation and trained junior engineers, reducing merge conflict incidents by **70%**.

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered scalable backend modules for core enterprise financial and reporting systems processing over **\$10M+ in daily transaction metrics**.
- Co-architected an automated accounting costing system, cutting end-of-month financial reconciliation processing times from **8 hours down to 45 minutes**.
- Monitored and optimized cloud infrastructure on AWS, achieving **99.99% uptime** across critical reporting web applications.
- Created high-performance Python database interfaces and Java unit test suites for PostgreSQL, ensuring **100% data integrity** during system migration.

Quality Assurance & Network Integration Engineer

February 2005 – December 2009 | Hospira, Inc., San Diego, CA

- Verified and validated software for **Symbiq** and **Plum A+** hospital infusion pumps — requirements-based manual testing, smoke testing, formal verification, and defect tracking in regulated medical device workflows.
- Collaborated with firmware and hardware engineers to test embedded device behavior, troubleshoot software upgrades, and resolve complex integration issues across pump, server, and hospital network environments.
- Supported embedded systems over wired and wireless LANs; built recovery scripts and tools to restore infusion device software and configuration after firmware upgrade failures.
- Worked with **CAN bus** and embedded communication architectures; developed a .NET Telnet client automating host-to-device communication for verification and field-support scenarios.
- Installed and validated drug library management client/server software for networked infusion devices; served as verification team technical lead for device and PC networking issues.
- Built enterprise wireless security test architecture (EAP, Cisco ACS, FreeRadius) and delivered **5 formal verification run-throughs** for first-lot-to-stock ahead of schedule.

EDUCATION & CERTIFICATIONS

Jun 2012 – Aug 2013: Full-time student at ITT Technical Institute, completing Associate of Science degree requirements between professional roles at FileTrek, Inc. and Fidelity Investments.

Associate of Science, Computer Electronics

2010 – 2013 | ITT Technical Institute, San Diego, CA

- Associate of Science Degree in Computer and Electronics Engineering Technology
 - GPA 3.67
-

Basic Military Combat Skills

September 1995 | Marine Corps Recruit Depot, San Diego, CA

- Graduated from Basic Training; promoted to Private First Class
