Abul Mustafa

Hadrian

Torrance, CA

Dear Abul Mustafa,

I am writing to express my interest in the Software Engineer position at Hadrian, as advertised. With over 15 years of experience in software engineering, specializing in cloud architecture and API development, I am excited about the opportunity to contribute to Hadrian's mission of revolutionizing manufacturing processes.

My background in developing scalable microservices and integrating AI solutions aligns well with Hadrian's focus on automation and deep tech. At CGJSoftware, Inc., I led the deployment of containerized Python microservices on AWS, significantly enhancing system performance and reducing latency. Additionally, my experience with AI-augmented development practices has consistently improved engineering workflows and delivery speeds.

I am particularly drawn to Hadrian's innovative approach to combining AI, robotics, and manufacturing, and I am eager to bring my expertise in cloud technologies and software architecture to your team. I am confident that my skills in Python, AWS, and microservices architecture will be an asset as Hadrian continues to scale and innovate.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to Hadrian's success.

Sincerely,

Cary Jones
