SUMMARY

Senior Backend Engineer with 15+ years building scalable cloud APIs, relational data systems, and distributed services on **AWS and GCP**. Deep production expertise in **Python** (FastAPI, Django) and **PostgreSQL** — schema design, query optimization, and high-integrity transaction pipelines. Proven delivering capital-adjacent systems: enterprise financial backends processing **\$10M+ daily metrics**, automated reconciliation, and real-estate investment analytics. Polyglot backend engineer with **Go** proficiency; remote-first owner who leads projects from design through production and champions code review, CI/CD, and reliability standards.

CORE COMPETENCIES

- Backend & APIs:** Python (FastAPI, Django, Flask), Go, RESTful API design, microservices, event-driven architecture, distributed systems, pytest, code review
- PostgreSQL & Data:** Schema design, indexing, query optimization, SQLAlchemy/ORM, migrations, Redis, MongoDB, financial and transactional data modeling
- Cloud:** AWS (ECS, Fargate, Lambda, RDS, S3, CloudWatch), GCP Compute, Docker, Kubernetes concepts, CI/CD (GitHub Actions), Secrets Manager
- Leadership:** End-to-end project ownership, cross-functional collaboration with product and finance stakeholders, Scrum Master, mentoring, engineering best practices

KEY IMPACT

- Engineered Python backends and **PostgreSQL interfaces** for enterprise financial systems processing **\$10M+ daily transaction metrics** at **99.99% uptime** on AWS.
- Co-architected automated reconciliation tooling — cut end-of-month batch processing from **8 hours to 45 minutes** through optimized SQL aggregation and pipeline redesign.
- Built event-driven pipelines on **AWS ECS/Fargate** handling **2.5M+ daily transactions** at **99.95% accuracy** across PostgreSQL, Redis, and external APIs.
- Deployed containerized microservices achieving API latency under **120ms** and **+45% throughput** improvement; custom ORM abstractions cut query boilerplate by **50%**.
- Led cross-functional teams as **Scrum Master**; established Git workflows and CI/CD gates reducing merge conflicts by **70%**.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Design and deploy scalable **Python backend services** on **AWS ECS/Fargate** — own architecture, PostgreSQL schemas, API contracts, and production observability.
 - Partner with client product and business teams to translate requirements into reliable, testable deliverables with CI/CD and staged rollouts.
 - Conduct code reviews and establish engineering standards across distributed microservice codebases.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered scalable backend modules and **PostgreSQL data interfaces** for core enterprise **financial reporting** systems at **99.99% uptime**.
 - Co-architected automated costing and reconciliation features with finance stakeholders — optimized relational queries and batch pipeline reliability.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Containerized services and deployed to **GCP**; optimized complex **PostgreSQL/Redshift** queries improving reporting performance by **38%**.
 - Built event-driven messaging pipelines on AWS with strict data-loss prevention during peak load.
-

API Developer, Web Developer, and System Architect

July 2016 – January 2018 | CT-REI, Inc., Austin, TX

- Built real-estate investment evaluation and **financial tracking** web applications; automated offer calculations boosting analysis throughput by **400%**.
-

Python API Developer

August 2013 – April 2014 | Fidelity Investments, Irving, TX

- Built **Django REST Framework** APIs with robust contract design, PostgreSQL-backed automation, and comprehensive pytest coverage.
-

Senior Software Engineer

May 2023 – July 2023 | CVS, Inc. (Remote)

- Decoupled legacy monolith into domain-oriented services; improved integration test speed by **50%** with Docker-based local environments.

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

- 15+ years equivalent professional backend software engineering experience
-

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
