Dear Yash Kaushik,

I am writing to express my interest in the DevOps Engineer position at TCS in Cincinnati, OH, as advertised. With over 15 years of experience in designing and implementing CI/CD pipelines, infrastructure automation, and cloud-native solutions, I am excited about the opportunity to contribute to TCS's mission of enhancing delivery velocity and operational efficiency through AI-assisted development.

My extensive experience with AI-assisted development tools such as GitHub Copilot and Cursor, coupled with my strong programming and scripting skills, positions me uniquely to excel in this role. I have successfully integrated development platforms with tools like GitHub and Jira, optimizing application performance while ensuring compliance with security and governance standards.

I am particularly drawn to this role at TCS because of the opportunity to leverage my skills in AI-enabled workflows and automation frameworks to drive engineering productivity and software quality. I am eager to bring my expertise in DevOps and cloud technologies to your esteemed organization.

Thank you for considering my application. I look forward to the possibility of discussing how I can contribute to the success of TCS.

Sincerely,
Cary Jones
