Hitakshi Kumar
TestingXperts

Dear Hitakshi Kumar,

I am writing to express my interest in the Full Stack Engineer (Python & React) position at TestingXperts. With over 15 years of experience in software development, specializing in Python and React, I am excited about the opportunity to contribute to your team in Santa Clara, CA.

Throughout my career, I have developed and maintained robust cloud-based solutions, leveraging technologies such as Docker, Google Cloud Platform, and AI tools like GitHub Copilot to enhance development processes. My experience in collaborating with cross-functional teams and delivering high-quality software solutions aligns well with the requirements of this role.

In my recent role as a Principal Software Engineering Consultant, I architected and deployed containerized Python microservices on Google Cloud Platform, enhancing system throughput and reducing latency. I am adept at writing clean, maintainable code and have a strong background in database management, automated testing, and CI/CD practices.

I am particularly drawn to this opportunity at TestingXperts because of your commitment to leveraging cutting-edge technologies and fostering a collaborative team environment. I am eager to bring my expertise in full stack development and cloud solutions to your organization.

Thank you for considering my application. I look forward to the possibility of discussing how I can contribute to the success of your team. Please feel free to contact me at your convenience.

Sincerely,

Cary Jones
