Application for Sr. Python Developer Position

Dear Prasant G,

I am writing to express my interest in the Sr. Python Developer position located in San Ramon, CA, as advertised. With over 15 years of software development experience and a strong focus on Python backend development, I am confident in my ability to contribute effectively to your team.

Throughout my career, I have honed my skills in Python, particularly with frameworks such as FastAPI, Django, and Flask. My experience in designing and developing RESTful and GraphQL APIs, coupled with a deep understanding of microservices architecture and event-driven systems, aligns perfectly with the requirements of this role.

I have extensive experience working with AWS services, including EC2, Lambda, and RDS, and have successfully implemented Docker and CI/CD pipelines to enhance deployment processes. My proficiency in Git version control and Agile/Scrum methodologies ensures efficient and collaborative development environments.

I am particularly drawn to this opportunity due to my passion for building scalable cloud-native backend applications. Although I have not worked directly in the retail or eCommerce domains, my adaptable skills and quick learning ability equip me to tackle new challenges effectively.

I look forward to the opportunity to discuss how I can contribute to your team. Please let me know a convenient time for us to connect.

Thank you for considering my application. I am eager to bring my expertise in Python development to your esteemed company.

Sincerely,
Cary Jones
