SUMMARY

Senior Software Engineer with 15+ years building reliable backend systems, **event-driven data pipelines**, and partner-facing integrations in healthcare and enterprise environments. Deep experience with explicit data contracts, **idempotent processing**, observability, and regulated workflows — including **HIPAA-compliant platforms** serving 500k+ profiles and pipelines processing **2.5M+ daily transactions** at 99.95% accuracy. Proactive owner who turns ambiguous requirements into durable platform capabilities; experienced with AI-augmented development (Cursor, Copilot) while maintaining deterministic controls for correctness-critical paths.

CORE COMPETENCIES

Backend & Data: Python, FastAPI, Django, event-driven architecture, ETL pipelines, data contracts, reconciliation, idempotency, PostgreSQL, Redis, SQL optimization

Integrations: REST APIs, partner file/API exchanges, webhook ingestion, OAuth2, B2B data workflows, automated validation, replay and recovery patterns

Cloud & Ops: AWS (ECS, Fargate, Lambda, RDS, S3), GCP, Docker, Kubernetes, GitHub Actions CI/CD, CloudWatch monitoring, runbooks, on-call ownership

Healthcare & Quality: HIPAA-compliant systems, regulated device verification (Hospira), auditability, data provenance, pytest, automated test coverage

KEY IMPACT

- Engineered **event-driven ETL pipelines** on AWS ECS/Fargate handling **2.5M+ daily transactions** at **99.95% accuracy** with explicit schemas, reconciliation, and observability across PostgreSQL, Redis, and external APIs.
- Architected **HIPAA-compliant Python REST APIs** for healthcare platforms serving **500k+ active user profiles** — identity, eligibility-style workflows, and secure partner data access.
- Built automated Python REST client at Rackspace executing **1,000+ test cases/hour** against ticketing APIs — dynamic test generation uncovering edge-case bugs pre-release.
- Integrated AI coding tools (Cursor, Copilot) into engineering workflows, increasing feature delivery speed by **35%** and expanding test coverage from **65% to 92%** without compromising review standards.
- Maintained **99.99% uptime** on AWS-hosted enterprise backends at Disney; co-architected financial reconciliation cutting processing from 8 hours to 45 minutes.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Designed and operated **event-driven data pipelines** and Python microservices (**FastAPI, Django**) on **AWS ECS/Fargate** — sub-**120ms** API latency, **+45% throughput**.
- Built partner-facing REST integrations with automated validation, CloudWatch telemetry, and CI/CD (GitHub Actions) for healthcare and e-commerce clients.
- Applied AI-augmented development practices while maintaining deterministic test suites and code review gates for production correctness.

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure **Python REST APIs** for **HIPAA-compliant** healthcare platforms serving **500k+ active user profiles**.
- Designed relational schemas and data models for member-facing workflows; implemented OAuth2, audit-friendly access patterns, and **99.9% availability**.
- Led cross-functional delivery with product and clinical stakeholders; established CI/CD and Git workflows reducing merge conflicts by **70%**.

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered Python backend modules for enterprise financial systems processing **\$10M+ in daily transaction metrics**.
- Built high-performance **Python–PostgreSQL** interfaces ensuring **100% data integrity** during large-scale migration and reconciliation workflows.
- Owned production services on AWS at **99.99% uptime**; triaged incidents and implemented durable fixes with root-cause follow-through.

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Built non-blocking async architectures using **AWS Pub/Sub** and Boto3, ensuring **zero data loss** during peak loads.
- Deployed containerized applications to **GCP** via gcloud CLI; optimized SQL for data warehouse reporting (+38% query performance).

Software Developer in Test

October 2015 – May 2016 | Rackspace, Inc., Austin, TX

- Built object-oriented Python REST client executing **1,000+ automated test cases/hour**; designed dynamic test-generator for ruleset edge-case discovery.

Quality Assurance & Network Integration Engineer

February 2005 – December 2009 | Hospira, Inc., San Diego, CA

- Five years in **regulated healthcare** — requirements-based verification, audit trails, hospital network integration, and formal verification for medical device software.

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
