SUMMARY

Senior Backend Engineer with 15+ years designing production APIs, distributed microservices, and integration-heavy platforms. Experienced architecting **modular service contracts**, high-volume **transaction pipelines**, and secure cloud systems on AWS. Five years at Hospira in regulated device verification — protocol-level testing, state-machine workflows, and hardware/software integration. Strong OOP and distributed-systems design in Python; working familiarity with Java ecosystems and eager to go deep on payment-terminal SDK architecture where wire-level correctness matters.

CORE COMPETENCIES

Backend & Architecture: Python (Django, FastAPI, Flask), REST APIs, microservices, SDK-style modular design, OOP, distributed systems, pytest, API contract versioning

Integrations & Protocols: External API orchestration, socket/HTTP interfaces, state-machine logic, device-adjacent integration testing, TLS/mTLS concepts, idempotent transaction handling

Data & Transactions: PostgreSQL, Redis, financial metric pipelines, reconciliation workflows, data integrity at scale, event-driven processing

Cloud & DevOps: AWS ECS/Fargate, Lambda, RDS, Docker, Kubernetes, CI/CD, CloudWatch, Secrets Manager, Linux production support

KEY IMPACT

- Co-architected Disney financial backend processing **\$10M+ daily transaction metrics** with **99.99% uptime** — automated reconciliation cutting runtime from 8 hours to 45 minutes.
- Built Django REST Framework APIs at Fidelity automating network provisioning — reduced setup from **4 hours to 10 minutes** with robust API contracts and automated test coverage.
- Engineered event-driven pipelines handling **2.5M+ daily transactions** at **99.95% accuracy** across PostgreSQL, Redis, and external services.
- Architected containerized Python microservices on AWS achieving API latency under **120ms** and **+45% throughput**.
- Five years verifying **embedded device software** and hospital network integrations — requirements traceability, formal verification, and low-level protocol debug in FDA-regulated workflows.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Architected modular **Python microservice platforms** (FastAPI, Django) on AWS ECS/Fargate — stable API contracts, integration adapters, and versioned deployment patterns for client teams.
 - Designed PostgreSQL schemas and Redis caching for high-concurrency endpoints; built monitoring, structured logging, and production triage tooling.
 - Led CI/CD pipelines with automated integration tests and staged rollouts across multi-service environments.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered Python backend modules for enterprise financial systems processing **\$10M+ in daily transaction metrics** with strict data-integrity requirements.
 - Built high-performance PostgreSQL interfaces during large-scale migration; maintained **99.99% uptime** on AWS-hosted reporting applications.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure Python REST APIs for HIPAA-compliant platforms serving **500k+ active user profiles**.
 - Implemented OAuth2, encryption hardening, and automated pre-deploy validation at **99.9% availability**.
-

Quality Assurance & Network Integration Engineer

February 2005 – December 2009 | Hospira, Inc., San Diego, CA

- Five years in **regulated device verification** — binary protocol testing, state-machine workflows, serial/network integration, and cross-team triage for infusion pump platforms.
 - Documented reproducible test procedures and debug tooling used by firmware, hardware, and QA engineers.
-

Python API Developer

August 2013 – April 2014 | Fidelity Investments, Irving, TX

- Built **Django REST Framework** backend APIs for datacenter network automation with serializers, permissions, and comprehensive pytest coverage.
-

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
