SUMMARY

Senior Software Engineer and technical founder with 15+ years building production **API-first platforms, event-driven automation, and AI-powered workflows** in Python. Proven track record owning systems end to end — from architecture and integration design through deployment and operations — across real estate, e-commerce, healthcare, and enterprise domains. Deep experience with **FastAPI, PostgreSQL, AWS, React**, and LLM integrations that eliminate manual work and create operational leverage at scale. Remote-first builder with a bias toward shipping, strong product instincts, and the independence to move fast on ambiguous problems.

CORE COMPETENCIES

- **Backend & APIs:** Python (FastAPI, Django, Flask, Asyncio), RESTful API design, microservices, event-driven architecture, third-party integrations
- **AI & Automation:** OpenAI API, LLM workflows, LangChain, RAG, AI-augmented engineering (Cursor, Claude, Copilot), document classification, operational automation
- **Cloud & Infrastructure:** AWS (Lambda, ECS, Fargate, S3, RDS), Docker, serverless patterns, GitHub Actions CI/CD, Linux, observability-minded ops
- **Data & Platforms:** PostgreSQL, Redis, MongoDB, SQL optimization, high-throughput pipelines, real-time sync patterns
- **Full Stack:** React, JavaScript, Node.js, payment and messaging system integrations, containerized deployment
- **Product Engineering:** End-to-end ownership, rapid iteration, cross-functional delivery, Scrum leadership, regulated and high-stakes environments

KEY IMPACT

- Built event-driven ETL pipelines on AWS processing **2.5M+ daily transactions** with **99.95% accuracy**, replacing manual reconciliation across PostgreSQL, Redis, and external APIs.
- Integrated LLMs and vector search into client data pipelines, automating document classification and cutting manual data entry by **60%**.
- Architected Python microservices on AWS (FastAPI, ECS), increasing throughput by **45%** and reducing API latency below **120ms**.
- Designed automated payment and messaging systems for real estate and logistics clients, improving sales conversion by **24%**.
- Automated B2B e-commerce order fulfillment at KeyIngredient, reducing manual processing by **90%**.

- Developed property data scrapers and investment automation at CT-REI, boosting analysis throughput by **400%**.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Own design, build, and deployment of scalable Python backend services and automation platforms for e-commerce, healthcare, and data clients — shipping from idea to production with minimal overhead.
 - Architect containerized FastAPI and Django microservices on AWS (ECS, Fargate, Lambda), improving throughput by **45%** and cutting API latency below **120ms**.
 - Build AI-powered workflows using OpenAI API and LangChain to automate operational tasks, document processing, and decision support.
 - Integrate third-party APIs, payment systems, and messaging services; establish CI/CD with GitHub Actions and Docker for reliable global delivery.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Designed event-driven architectures with AWS Pub/Sub messaging, ensuring **zero data loss** during peak loads and improving deployment frequency by **3x**.
 - Containerized Python, React, and Node.js applications with Docker; deployed to GCP and AWS with automated release pipelines.
 - Optimized PostgreSQL and Redshift workloads, increasing reporting query performance by **38%**.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Built scalable backend modules for enterprise systems processing **\$10M+ in daily transaction metrics** with **99.99% uptime** on AWS.
 - Co-architected automated financial processing, cutting batch runtime from **8 hours to 45 minutes**.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure Python REST APIs for HIPAA-compliant platforms serving **500k+ active users**; built CI/CD automation and production Linux environments at **99.9% availability**.
-

API Developer, Web Developer, and System Architect

July 2016 – January 2018 | CT-REI, Inc. — Austin, TX

- Built real estate investment evaluation and financial tracking web applications; automated property data ingestion from appraisal records.

- Developed Python scrapers and calculation engines that boosted investment analysis throughput by **400%** — directly relevant to property operations automation.
-

Software Developer and Scrum Master

April 2014 – August 2015 | KeyIngredient — Austin, TX

- Built core **e-commerce backend REST APIs** on Google App Engine for a consumer marketplace; automated B2B order fulfillment, cutting manual processing by **90%**.
-

Field Wireman & Communications Specialist

September 1995 – September 1999 | United States Marine Corps

- Delivered mission-critical systems under pressure with disciplined ownership, accountability, and clear communication.

EDUCATION

Associate of Science, Computer Electronics

2010 – 2013 | ITT Technical Institute, San Diego, CA (GPA 3.67)
