

Cary Jones

Lead Backend Software Engineer | Golang & AWS Expert

Temple City, CA 91780 (626) 272-2567 cgjonesdev@gmail.com linkedin.com/in/cary-g-jones github.com/cgjonesdev
cgjonesdev.github.io/carygjones

SUMMARY

Lead Backend Software Engineer with extensive experience in designing and building scalable **Golang** backend services and distributed microservices in **AWS**. Proven track record in the financial services domain, leading engineering initiatives, and mentoring development teams to deliver high-performance, resilient systems. Adept in leveraging cloud-native technologies and modern development practices to solve complex engineering challenges.

CORE COMPETENCIES & TECHNICAL SKILLS

- Languages & Frameworks:** Golang, Python, Java, SQL, Node.js, Scala, RESTful API Design
- Cloud & DevOps:** AWS (ECS, Lambda, RDS), Docker, Kubernetes, CI/CD, Git, Agile/Scrum
- Architecture & Methodologies:** Microservices, Distributed Systems, Object-Oriented Design, Test-Driven Development
- Database Technologies:** SQL, NoSQL, Open Source RDBMS, Database Optimization
- AI & Machine Learning Integration:** AI-assisted development tools (GitHub Copilot, Cursor, Claude Code)

ACCOMPLISHMENTS

- Led the development of cloud-native applications and distributed microservices on AWS, achieving **99.99% uptime** and optimizing system performance.
- Architected and implemented secure, resilient backend services for financial platforms, processing over **\$10M+ in daily transactions**.
- Mentored junior engineers and promoted best practices in engineering, resulting in a **35% increase in team productivity**.
- Collaborated with cross-functional teams to deliver business-critical solutions, enhancing system scalability and reliability.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Own backend services end-to-end — FastAPI/Django microservices on AWS ECS/Fargate with REST APIs, PostgreSQL, Redis, CI/CD, and production monitoring.
- Drive technical architecture for scalability and reliability; participate in design reviews and mentor engineers on testing and operational excellence.
- Collaborate cross-functionally with product stakeholders across healthcare and e-commerce; deliver high-impact features with clear ownership from inception to production.

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered scalable Python backend modules and PostgreSQL interfaces on AWS for enterprise financial systems processing **\$10M+ daily metrics**.
- Owned on-call for distributed backend services at **99.99% uptime**; optimized queries cutting reconciliation from **8 hours to 45 minutes**.

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure Python REST APIs for HIPAA-compliant healthcare platforms serving 500k+ profiles — scheduling, member data, and privacy-conscious access patterns.
- Configured production Linux environments, SSL/TLS, automated backups, and CI/CD pre-deploy scripts achieving **99.9% availability**.

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Containerized Python applications with Docker; deployed to GCP via gcloud CLI and AWS, improving deployment frequency **3x**.
- Built async messaging architectures (Pub/Sub, Boto3) preventing bottlenecks and ensuring **zero data loss** during peak loads.

Quality Assurance & Network Integration Engineer

February 2005 – December 2009 | Hospira, Inc., San Diego, CA

- Regulated healthcare environment — requirements-based verification, audit documentation, hospital network integration, and security testing for infusion pump software.

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
