Dear Hiring Team at Ashby,

I am writing to express my enthusiasm for the Staff Platform Engineer - Americas position at Ashby. With over 15 years of experience in software engineering and cloud infrastructure, I am excited about the opportunity to contribute to Ashby's mission of revolutionizing talent acquisition through innovative technology.

My background in building scalable cloud platforms and microservices aligns well with Ashby's needs. At CGJSoftware, I have led projects that involved architecting containerized Python microservices on AWS, which increased system throughput by 45% and reduced latency significantly. My ability to integrate AI tools into development workflows has also resulted in a 35% boost in feature delivery speed, demonstrating my commitment to efficiency and innovation.

I am particularly drawn to Ashby's emphasis on code-as-infrastructure and the opportunity to work on projects that enhance both developer and user experiences. The prospect of optimizing infrastructure for scalability and security, while collaborating with a talented team, is highly appealing to me. I am eager to bring my expertise in DevOps practices and secure coding to Ashby's dynamic environment.

Thank you for considering my application. I look forward to the possibility of discussing how I can contribute to Ashby's continued success and growth.

Sincerely,
Cary Jones
