SUMMARY

Senior Backend Engineer with 15+ years owning production systems end-to-end — architecture, data modeling, APIs, and on-call reliability — in **healthcare, financial, and regulated environments** where accuracy and user trust matter. Experienced partnering with product and design to shape requirements, not just implement them; mentoring engineers on backend patterns and operational excellence. Deep **Python** backend on **AWS and GCP**; comfortable ramping on **Go, Kubernetes, and Terraform** where system design and long-term health are the priority.

CORE COMPETENCIES

Backend & Architecture: Python (FastAPI, Django, Flask), RESTful API design, data modeling, microservices, PostgreSQL, Redis, system design reviews, pytest

Cloud & Reliability: AWS (ECS, Fargate, Lambda, RDS), GCP (container deploys), Docker, Kubernetes basics, CI/CD, observability, 99.99% uptime ownership

Regulated & Complex Workflows: HIPAA-compliant healthcare APIs, financial reporting pipelines, medical device verification (Hospira), audit-friendly access patterns

Product & Leadership: Cross-functional delivery with PMs and designers, 0-to-1 product ownership, Scrum Master, engineer mentoring, AI-augmented development (Cursor, Copilot)

KEY IMPACT

- Architected **HIPAA-compliant REST APIs** serving **500k+ healthcare user profiles** — privacy guardrails, scheduling workflows, and **99.9% availability**.
- Built **event-driven Python pipelines** on AWS handling **2.5M+ daily transactions** at **99.95% accuracy** with monitoring, documentation, and automated test coverage.
- Owned enterprise backends at **99.99% uptime**; cut financial batch reconciliation from **8 hours to 45 minutes** through PostgreSQL optimization and pipeline redesign.
- Deployed containerized services to **GCP and AWS**, improving release frequency **3x** while preserving rollback safety and observability.
- Five years in **regulated healthcare** at Hospira — formal verification, audit trails, and hospital network integration for life-critical systems.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Own **backend systems end-to-end** for B2B clients — FastAPI/Django microservices on AWS ECS/Fargate, REST APIs, PostgreSQL, Redis, CI/CD, and production monitoring.
 - Partner with product stakeholders to shape requirements and architectural tradeoffs; deliver 0-to-1 features with clear ownership from design through on-call.
 - Mentor engineers on backend patterns, testing discipline, and reliability; reduced API latency to under **120ms** and increased throughput **45%**.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure **Python REST APIs** for **HIPAA-compliant** healthcare platforms serving **500k+ profiles** — member data, scheduling, and privacy-conscious access for people navigating complex care workflows.
 - Led cross-functional offshore team as Scrum Master; established CI/CD and documentation practices achieving **99.9% availability**.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered scalable Python backend modules and PostgreSQL interfaces on AWS for enterprise financial systems processing **\$10M+ daily metrics**.
 - Owned on-call for distributed backend services at **99.99% uptime**; co-architected automated costing pipeline cutting reconciliation from **8 hours to 45 minutes**.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Containerized Python applications with Docker; deployed to **GCP** and AWS, improving deployment frequency **3x**.
 - Built async messaging architectures (Pub/Sub, event-driven patterns) ensuring **zero data loss** during peak loads.
-

Software Developer and Scrum Master

April 2014 – August 2015 | KeyIngredient, Austin, TX

- Built e-commerce backend APIs on Google AppEngine for a **two-sided marketplace**; partnered with product on fulfillment automation and consumer-facing features.
-

Quality Assurance & Network Integration Engineer

February 2005 – December 2009 | Hospira, Inc., San Diego, CA

- Regulated healthcare — requirements-based verification, audit documentation, and hospital network integration for infusion pump software serving patients in critical care.
-

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
