Cover Letter

Dear Hiring Manager,

I am writing to express my interest in the Senior Backend Engineer position at Instrumentl as advertised on LinkedIn. With over 15 years of experience in backend development and a strong track record in designing scalable REST APIs and microservices using Python frameworks such as FastAPI and Django, I am confident in my ability to contribute effectively to your team.

Throughout my career, I have demonstrated a deep understanding of cloud infrastructure, particularly with AWS and GCP, and have successfully deployed containerized applications using Docker and Kubernetes. My experience in collaborating with cross-functional teams to deliver high-quality software solutions aligns well with Instrumentl's goals to innovate and scale its backend services.

At CGJSoftware, Inc., I led the development of event-driven ETL pipelines and integrated AI coding assistance tools into engineering workflows, achieving significant improvements in feature delivery speed and code quality. I am eager to bring this expertise to Instrumentl and help drive the development of robust and efficient backend systems.

I am excited about the opportunity to join Instrumentl and contribute to its mission of delivering impactful software solutions. Thank you for considering my application. I look forward to the possibility of discussing how I can contribute to your team.

Sincerely,
Cary Jones
