SUMMARY

Technical Lead and Senior Software Engineer with 15+ years owning architecture and shipping production code in **Python (FastAPI, Django)**, **REST APIs**, and **PostgreSQL** systems. Hands-on leader who runs design reviews, mentors engineers, and stays in the codebase. Proven in **regulated and mission-sensitive environments** — HIPAA healthcare platforms, enterprise financial reporting, and medical-device verification. Experienced with **Docker/Kubernetes**, CI/CD, OAuth2/JWT authentication, and full-stack delivery (Python backends with React/Node.js frontends). U.S. Marine Corps veteran; clear communicator with senior stakeholders.

CORE COMPETENCIES

Technical Leadership: Architecture ownership, design and code reviews, mentoring, Scrum Master, cross-functional delivery with product and business stakeholders

Python & APIs: FastAPI, Django, Flask, Sanic, RESTful API design, microservices, async Python, pytest, secure API patterns

Data & Search: PostgreSQL, SQLAlchemy/ORM, schema design, query optimization, Redis, MongoDB; indexing and high-volume retrieval patterns

Full-Stack: React, Node.js, JavaScript, HTML/CSS; containerized full-stack apps on Docker; API-first integration with modern frontends

Platform & Security: Docker, Kubernetes, AWS ECS/Fargate, GCP, CI/CD (GitHub Actions, GitLab CI), OAuth2/JWT/RBAC, encryption, HIPAA-aware development

KEY IMPACT

- Led containerized **FastAPI/Django microservices** on AWS — **+45% throughput**, API latency under **120ms**, with architecture reviews and CI/CD gates across client teams.
- Engineered **PostgreSQL-backed financial systems** at Disney processing **\$10M+ daily metrics** at **99.99% uptime**; cut batch reconciliation from **8 hours to 45 minutes**.
- Architected **HIPAA-compliant REST APIs** (OAuth2, encryption) serving **500k+ user profiles**; established secure integration patterns for regulated healthcare delivery.
- Built event-driven pipelines on **AWS ECS/Fargate** handling **2.5M+ daily transactions** at **99.95% accuracy** across PostgreSQL, Redis, and external APIs.
- Containerized **Python, React, and Node.js** applications on Docker/GCP — **3x** deployment frequency improvement with documented handoff and runbooks.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Own technical direction and hands-on delivery for client **Python/FastAPI** backends on **AWS ECS/Fargate** — architecture, API contracts, PostgreSQL schemas, code reviews, and production support.
 - Lead design reviews and mentor engineers; establish CI/CD, testing standards, and secure integration patterns for enterprise clients.
 - Integrate LLM and document-automation capabilities into data pipelines while maintaining audit-friendly, maintainable codebases.
-

Senior Software Engineer

May 2023 – July 2023 | CVS, Inc. (Remote)

- Led analysis decoupling legacy monolith toward domain-oriented microservices; improved Docker-based integration testing speed by **50%**.
 - Advised leadership on DDD and service boundaries; validated domain isolation with Python proof-of-concept harnesses.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Built scalable backend modules and **PostgreSQL interfaces** for enterprise financial reporting at **99.99% uptime**.
 - Co-architected Portfolio Insights tooling — transformed monolith SQL into web applications for Payroll and costing teams; partnered closely with finance stakeholders.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Containerized **Python, React, and Node.js** applications on Docker; deployed to GCP with improved release cadence and documented architecture diagrams.
 - Optimized PostgreSQL/Redshift reporting queries — **+38%** performance; built async AWS messaging pipelines with zero data loss at peak load.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure **Python REST APIs** for HIPAA-compliant healthcare — **OAuth2**, JWT/RBAC, encryption, auditable access for **500k+ profiles**.
 - Scrum Master for cross-functional team; CI/CD pre-deploy scripts, production Linux hardening, and Git workflow documentation.
-

Python API Developer

August 2013 – April 2014 | Fidelity Investments, Irving, TX

- Supervised junior developers; built **Django REST Framework** services with PostgreSQL — reduced provisioning errors by **95%** (4 hr → 10 min).

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

- 15+ years equivalent professional software engineering experience
-

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
