Dear Hiring Manager,

I am writing to express my interest in the Sr. Software Engineer position at Lyra Health. With over 15 years of experience in software engineering, specializing in cloud architecture and AI integration, I am excited about the opportunity to contribute to Lyra Health's mission of transforming mental health care.

Throughout my career, I have successfully developed scalable microservices and RESTful APIs, particularly in the healthcare sector. My experience with HIPAA-compliant systems and secure API development aligns well with Lyra Health's commitment to privacy and security. I have a proven track record of integrating AI technologies to enhance system capabilities and improve user experiences.

At CGJSoftware, Inc., I led the architecture and deployment of containerized Python microservices on AWS, significantly improving system throughput and reducing latency. My ability to lead cross-functional teams and implement AI-augmented development practices has consistently resulted in increased engineering efficiency and reduced bug resolution times.

I am particularly drawn to Lyra Health's innovative approach to mental health care and the opportunity to work on impactful projects that make a difference in people's lives. I am eager to bring my technical expertise and passion for healthcare technology to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the needs of Lyra Health.

Sincerely,
