Dear Harsh Singh,

I am writing to express my interest in the DevOps Engineer position at Scalable Systems as advertised. With extensive experience in GCP, Kubernetes, and CI/CD automation, I am confident in my ability to contribute effectively to your team.

In my current role as a Principal Software Engineering Consultant, I have successfully led DevOps projects focusing on GCP infrastructure and Kubernetes orchestration. My hands-on experience with Jenkins, Terraform, and scripting languages such as Python and Bash has enabled me to streamline deployment processes and enhance system reliability.

I am particularly drawn to this opportunity at Scalable Systems due to your emphasis on managing lower/non-production environments and supporting cloud-based application environments. My background aligns well with these requirements, and I am eager to bring my skills in troubleshooting, automation, and environment management to your organization.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to the success of Scalable Systems.

Sincerely,

Cary Jones
