SUMMARY

Senior Software Engineer with 15+ years building **scalable data pipelines, ETL workflows, and backend data services** on **AWS and GCP**. Proven in high-volume ingestion (2.5M+ daily transactions), PostgreSQL optimization, event-driven architecture, and production observability. Experienced in regulated financial and healthcare data environments where accuracy, freshness, and auditability are critical. Mentors engineers on pipeline reliability and data quality practices.

CORE COMPETENCIES

- Data Platform & Pipelines:** Python ETL/ELT, event-driven ingestion, PostgreSQL schema design & query optimization, Redis, async queues (SQS/Pub/Sub patterns), idempotent processing, data observability
- Cloud & Infrastructure:** AWS (ECS, Fargate, Lambda, RDS, S3, Redshift-adjacent workloads), GCP, Docker, CI/CD, monitoring/alerting, on-call production support
- Backend & APIs:** FastAPI, Django, RESTful services, microservices, pytest, structured logging, secrets management
- Regulated Data:** Disney financial reporting (\$10M+ daily metrics), HIPAA healthcare APIs (Alan Health), audit-friendly access patterns

KEY IMPACT

- Built **event-driven Python pipelines** on AWS handling **2.5M+ daily transactions** at **99.95% accuracy** with monitoring, documentation, and automated test coverage.
- Cut Disney financial batch reconciliation from **8 hours to 45 minutes** via PostgreSQL optimization and pipeline redesign — direct parallel to large-scale ETL performance work.
- Optimized AWS Redshift reporting queries **38%**; designed async messaging preventing bottlenecks and **zero data loss** during peak loads.
- Maintained **99.99% uptime** on production data-backed services; participated in on-call rotation and post-incident remediation.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Own **data ingestion and backend pipelines** — Python microservices on AWS ECS/Fargate, PostgreSQL, Redis, REST APIs, CI/CD, and production monitoring.
 - Design scalable interfaces to data stores; mentor engineers on pipeline reliability, testing, and observability best practices.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered backend modules and **PostgreSQL data interfaces** for enterprise financial systems processing **\$10M+ daily metrics**.
 - Co-architected automated costing pipeline cutting batch reconciliation from **8 hours to 45 minutes**; owned on-call at **99.99% uptime**.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Built async **event-driven data pipelines** (Pub/Sub, Boto3) on AWS; optimized **Redshift** reporting queries **38%**.
 - Deployed containerized services to GCP and AWS with **3×** faster release cadence and rollback-safe observability.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected HIPAA-compliant Python APIs and data access layers serving **500k+ profiles** with strict quality and availability standards.

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67
