SUMMARY

Senior Software Engineer with 15+ years delivering production cloud applications, backend APIs, and SQL-driven data systems on **AWS and GCP**. Proven track record modernizing **legacy monoliths** into maintainable microservices while shipping features independently alongside product and cross-functional teams. Deep **PostgreSQL** and relational modeling experience at enterprise scale — financial reporting, healthcare platforms, and high-volume transaction pipelines. Hands-on with Python (FastAPI, Django), Docker, CI/CD, and pragmatic AI/LLM integrations where they accelerate delivery. **Scrum Master** and technical lead comfortable in complex, changing environments.

CORE COMPETENCIES

Backend & Full-Stack: Python (FastAPI, Django, Flask), REST APIs, async services, React integration, service-oriented architecture, pytest, feature delivery with product teams

Cloud (AWS / GCP): ECS, Fargate, Lambda, RDS, S3, CloudWatch, Secrets Manager, GCP Compute, Docker, Kubernetes concepts, CI/CD (GitHub Actions, GitLab CI)

SQL & Data: PostgreSQL, MySQL, Redis, MongoDB — schema design, query optimization, indexing, Redshift reporting, ETL pipelines processing 2.5M+ daily transactions

Legacy & Modernization: Monolith decoupling, domain-driven design, legacy test framework refactors, cross-system integration, regulated and high-availability production support

AI (Bonus): LLM API integration, RAG pipelines, LangChain, AI-assisted development tooling (Cursor, Copilot) — applied to accelerate engineering, not as primary deliverable

KEY IMPACT

- Engineered Python backends and **PostgreSQL interfaces** for enterprise financial systems processing **\$10M+ daily metrics** at **99.99% uptime** on AWS.
- Co-architected automated reconciliation tooling — cut batch runtime from **8 hours to 45 minutes** through optimized SQL aggregation and pipeline redesign.
- Decoupled **legacy monolithic codebases** at CVS for domain-driven microservices migration; built Docker-based integration test harnesses improving local test speed by **50%**.
- Deployed containerized Python microservices on **AWS ECS/Fargate and GCP**, achieving API latency under **120ms** and **+45% throughput** improvement.
- Led cross-functional teams as **Scrum Master**, accelerating MVP timelines by **3 weeks** and reducing merge conflicts by **70%** through CI/CD and branching standards.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Deliver cloud-native Python microservices (FastAPI, Django) on **AWS ECS/Fargate** for enterprise clients — independent feature ownership from design through production support.
 - Maintain and extend **legacy systems** alongside greenfield services; integrate LLM tooling into data pipelines where it reduces manual processing by **60%**.
 - Design relational schemas and optimize PostgreSQL/Redis data layers; implement CI/CD with automated integration tests and staged rollouts.
-

Senior Software Engineer

May 2023 – July 2023 | CVS, Inc. (Remote)

- Analyzed and decoupled **legacy monolithic codebases** for domain-driven microservices architecture; advised leadership on DDD and service boundary design.
 - Built containerized domain modules with Docker-Compose for faster integration testing across changing system dependencies.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered scalable Python backend modules and **PostgreSQL data interfaces** for core financial reporting systems at **99.99% uptime**.
 - Partnered with accounting and product stakeholders to ship automated costing features; optimized cloud infrastructure on AWS for critical reporting applications.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Containerized Python, React, and Node.js applications; deployed to **GCP** via gcloud CLI, improving deployment frequency by **3x**.
 - Optimized complex **SQL queries** for AWS Redshift stress tests, increasing reporting performance by **38%**.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure Python REST APIs and PostgreSQL backends for HIPAA-compliant platforms serving **500k+ user profiles**.
 - Led offshore engineering team as **Scrum Master**; established CI/CD pre-deploy scripts and Git standards for predictable releases.
-

Python API Developer

August 2013 – April 2014 | Fidelity Investments, Irving, TX

- Built **Django REST Framework** APIs automating datacenter network provisioning — reduced setup from **4 hours to 10 minutes** with robust SQL-backed contract design.
-

Python Programmer

May 2016 – July 2016 | Dell, Inc., Austin, TX

- Refactored **legacy automated test framework** software in Python — eliminated circular dependencies and reduced crash rates during long-running test executions by **80%**.

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
