SUMMARY

Senior Backend Engineer with 15+ years building production Python APIs, distributed microservices, and AWS cloud infrastructure. Deep experience designing **relational data models**, optimizing **PostgreSQL** at scale, and operating service-oriented architectures with high availability. Proven in regulated healthcare — architected **HIPAA-compliant REST APIs** serving 500k+ user profiles — and at enterprise scale on financial platforms processing millions of daily transactions. Remote-first engineer focused on reliable backend systems that improve real-world outcomes.

CORE COMPETENCIES

Python Backend: Django, Django REST Framework, FastAPI, Flask, Asyncio, Celery, pytest, SQLAlchemy, Pydantic

APIs & Architecture: RESTful API design, microservices, event-driven pipelines, distributed systems, OAuth2/JWT, service-oriented architecture

AWS & DevOps: ECS, Fargate, Lambda, RDS (PostgreSQL), S3, CloudWatch, Secrets Manager, Docker, Kubernetes, CI/CD (GitHub Actions)

Data & Performance: PostgreSQL, MySQL, Redis, schema design, query optimization, indexing, connection pooling, zero-downtime migrations

KEY IMPACT

- Architected secure Python REST APIs for **HIPAA-compliant healthcare platforms** serving **500k+ active user profiles** with OAuth2 and encryption hardening.
- Engineered event-driven ETL pipelines on **AWS ECS/Fargate** handling **2.5M+ daily transactions** at **99.95% accuracy** across PostgreSQL, Redis, and external APIs.
- Built Django REST Framework APIs at Fidelity automating network provisioning — reduced setup from **4 hours to 10 minutes** with robust API contract design and pytest coverage.
- Deployed containerized Python microservices on AWS achieving API latency under **120ms** and **+45% throughput** improvement.
- Co-architected Disney financial backend processing **\$10M+ daily metrics** with **99.99% uptime** on AWS; optimized PostgreSQL interfaces for data integrity at scale.

PROFESSIONAL EXPERIENCE

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure **Python REST APIs** for **HIPAA-compliant** healthcare platforms serving **500k+ active user profiles**.
- Designed relational data models and PostgreSQL schemas supporting patient-facing workflows at scale.
- Implemented OAuth2 authentication, SSL/TLS, automated CI/CD pre-deploy scripts, and production Linux environments at **99.9% availability**.
- Led cross-functional offshore team as Scrum Master; established Git workflows reducing merge conflicts by **70%**.

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Architected containerized Python microservices (**FastAPI, Django**) on **AWS ECS/Fargate** for healthcare and e-commerce clients — latency under **120ms**, **+45% throughput**.
- Designed PostgreSQL schemas, optimized ORM queries, and implemented Redis caching for high-read distributed API endpoints.
- Built CI/CD pipelines with automated pytest suites, CloudWatch monitoring, and Secrets Manager credential injection.

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered Python backend modules for enterprise financial systems processing **\$10M+ in daily transaction metrics**.
- Built high-performance **Python–PostgreSQL** interfaces ensuring **100% data integrity** during large-scale system migration.
- Maintained **99.99% uptime** on AWS-hosted reporting applications; co-architected automated costing system cutting reconciliation from 8 hours to 45 minutes.

Python API Developer

August 2013 – April 2014 | Fidelity Investments, Irving, TX

- Built **Django REST Framework** backend APIs for datacenter network automation — reduced provisioning from **4 hours to 10 minutes**.
- Owned API contract design, serializers, permissions, and automated test coverage; mentored junior developers.

Quality Assurance & Network Integration Engineer

February 2005 – December 2009 | Hospira, Inc., San Diego, CA

- Five years in **regulated medical device** verification — requirements-based testing, formal verification, and hospital network integration for infusion pump systems.

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
