Senior Software Engineer | Full-Stack &
Python Technical Lead

6355 Oak Avenue Apt 18
Temple City, CA 91780

Summary

Senior Software Engineer & Technical Lead with over 15 years of experience architecting, building, and maintaining scalable **Python microservices**, full-stack web applications, and mission-critical **REST APIs**. Proven record leading agile engineering teams, mentoring junior developers, and establishing reusable project templates and development best practices. Strong expertise in core technology stack including **Python, React.js, JavaScript, and SQL/PostgreSQL**, combined with hands-on experience delivering secure, HIPAA-compliant healthcare solutions, complex ETL pipelines, and automated CI/CD deployments.

Core Competencies & Technical Skills

- **Core Stack & Languages:** Python (Asyncio, FastAPI, Django, Flask, Sanic), JavaScript (ES6+), React.js / Redux, SQL, Go (Golang), HTML5, CSS3, Zsh/Bash
- **Backend Architecture & APIs:** Microservices Architecture, RESTful API Design, Event-Driven Systems, ETL & Data Pipelines, Web Scraping & Automation Scripting
- **Databases & Data Engineering:** PostgreSQL, MySQL, Redis, SQL Query Optimization, ORM/SQLAlchemy, Database Schema Design, Mission-Critical Queries
- **DevOps & Infrastructure:** Docker, Kubernetes, CI/CD (GitHub Actions, GitLab CI), AWS (ECS, Fargate, Lambda, S3, RDS), GCP, NGINX, Git Version Control
- **Leadership & Engineering Culture:** Technical Leadership, Agile/Scrum Coaching, Project Architypes & Starter Templates, Code Reviews, Cross-Functional Team Collaboration

Key Accomplishments

- Engineered event-driven ETL data pipelines using AWS ECS, Fargate, and Airflow, executing mission-critical SQL queries handling **2.5M+ daily transactions** with **99.95% accuracy**.
- Created standardized project starter templates and architectural guidelines for microservices, reducing new engineer onboarding time and speeding up MVP project delivery by **3 weeks**.
- Architected secure microservices and patient-facing web applications adhering to healthcare security standards (OAuth2, Fernet encryption, HIPAA rulesets), uncovering and mitigating key vulnerabilities.
- Integrated React.js and modern JavaScript frontends with high-throughput Python backend APIs, increasing application performance by **45%** and lowering API latency below **120ms**.
- Mentored and coached junior and mid-level software engineers through structured pair programming and code reviews, resulting in a **35% increase in team engineering velocity**.

Professional Experience

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present

Los Angeles, CA / Remote

CGJSoftware, Inc.

- Lead cross-functional engineering efforts across product, design, and QA to design, test, deploy, and maintain mission-critical software solutions.
- Architect containerized Python backend microservices (FastAPI, Django) and high-performance SQL database systems, scaling API throughput by **45%**.
- Establish reusable project scaffolding templates and standardized CI/CD pipelines (Docker, Kubernetes, GitHub Actions) for client development teams.
- Provide long-term technical vision and mentorship for junior developers, driving code quality improvements and reducing bug resolution turnaround by **40%**.

Senior Software Engineer

May 2023 – July 2023

CVS, Inc. — (100% Remote)

- Analyzed and decoupled complex monolithic healthcare backend systems into modular, scalable microservices.
- Constructed containerized domain modules using Docker and Docker-Compose, increasing localized automated integration testing speed by **50%**.
- Advised engineering leadership on system architecture and Domain-Driven Design (DDD) to isolate core business processes and improve platform stability.

Senior Software Engineer & Scrum Master

October 2021 – November 2022

Disney Corporation, Inc. — (100% Remote)

- Engineered scalable full-stack backend services and complex SQL data models processing enterprise financial datasets.
- Led cross-functional agile teams through sprint planning and daily standups as Scrum Master, prioritizing project requirements and delivery timelines.
- Refactored legacy database schemas and wrote mission-critical SQL queries that improved data processing speed by **28%**.

Software Developer & Scrum Master

April 2014 – August 2015

KeyIngredient — Austin, TX

- Guided cross-functional agile teams, conducted peer code reviews, and implemented core web backend API endpoints.
 - Automated complex B2B data processing and ETL scripts compliant with enterprise standards, cutting manual processing time by **90%**.
-

Field Wireman & Communications Specialist

September 1995 – September 1999

United States Marine Corps — San Diego, CA & Overseas

- Configured and deployed tactical field telecommunications networks under high-pressure military operations, maintaining 100% mission uptime.

Education & Certifications

Associate of Science : Computer Electronics

2010 to 2013

ITT Technical Institute — San Diego, CA

- Degree in Computer and Electronics Engineering Technology (GPA 3.67)
