

Cary Jones

Senior Software Engineer | Python Backend Systems & Excel COM Automation

Temple City, CA (Remote) (626) 272-2567 cgjonesdev@gmail.com linkedin.com/in/cary-g-jones

SUMMARY

Senior Software Engineer with 15+ years building production backend services, APIs, and automation pipelines in **Python**, with hands-on **VBA and COM/Office interop** experience automating **Microsoft Excel** and Office workflows on Windows. Proven track record operating scalable, observable systems — event-driven architectures, worker-style processing, queues, retries, and output validation — in financial reporting, healthcare, and enterprise environments. Combines deep engineering fundamentals (concurrency, debugging, performance tuning) with pragmatic ownership from design through production reliability.

CORE COMPETENCIES

- **Python Backend Engineering:** Production APIs and services (FastAPI, Django, Flask), unit/integration testing, error handling, observability, CI/CD, Git
- **Excel & Office Automation:** VBA, COM/Office Interop, macro-enabled workbooks, programmatic Excel automation, Windows desktop integration, COM debugging
- **Distributed Systems:** Event-driven architecture, message queues, worker pools, idempotent processing, failure recovery, throughput tuning
- **Cloud & Infrastructure:** AWS (Lambda, ECS, Fargate, S3, RDS), Docker, Kubernetes, Linux/Windows cross-stack integration
- **Data & Validation:** PostgreSQL, SQL optimization, structured output extraction, data integrity checks, audit-friendly processing
- **Regulated Environments:** HIPAA-compliant healthcare platforms, enterprise financial reporting systems, secure coding practices

SELECTED IMPACT

- Engineered event-driven pipelines on AWS processing **2.5M+ daily transactions** with queue-based workflows, retries, and **99.95% accuracy**.
- Built enterprise financial backend modules at Disney processing **\$10M+ in daily transaction metrics** with strict data integrity and **99.99% uptime**.
- Automated B2B fulfillment and document workflows, cutting manual processing by up to **90%** through programmatic integrations.
- Architected containerized microservices with observability and CI/CD guardrails, improving throughput by **45%** and reducing API latency below **120ms**.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Design and operate production Python backend services — clean, tested, observable, and maintainable — across cloud and integration-heavy environments.
 - Build event-driven data pipelines with queue-based processing, failure recovery, and output validation before downstream persistence.
 - Own services end to end: architecture, deployment, performance optimization, and production support across legacy and modern stacks.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered scalable backend modules for **enterprise financial reporting systems**, processing high-volume transaction metrics with strict integrity requirements.
 - Co-architected automated reconciliation workflows, reducing batch processing from **8 hours to 45 minutes** with validated outputs and **100% data integrity**.
 - Optimized PostgreSQL interfaces and AWS infrastructure for mission-critical financial workloads at **99.99% uptime**.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Delivered HIPAA-compliant backend APIs and automation in a **regulated, audited environment** with access controls and production release discipline.
 - Established CI/CD pre-deploy scripts and observability practices supporting **500k+ active user profiles**.
-

Software Developer — VBA/COM Automation

January 2011 – June 2012 | FileTrek, Inc. — Los Angeles, CA

- Developed **VBA macros and COM/Office interop** scripts to automate **Microsoft Excel** and Office workflows for enterprise operations.
 - Programmatically opened macro-enabled workbooks, drove recalculation and data extraction, and integrated results with backend processing pipelines.
 - Debugged fragile COM-dependent automation on Windows — handling failures, preserving workbook behavior, and maintaining reliable scripted outputs.
-

Field Wireman & Communications Specialist

September 1995 – September 1999 | United States Marine Corps

- Maintained high-availability systems under strict operational requirements and accountable production ownership.

EDUCATION

Associate of Science, Computer Electronics

2010 – 2013 | ITT Technical Institute, San Diego, CA (GPA 3.67)

- Equivalent professional experience: 15+ years production software engineering
