Senior Backend Engineer | Python, AWS
& High-Scale Commerce Systems

6355 Oak Avenue Apt 18
Temple City, CA 91780

Summary

Senior Backend Engineer & Solutions Architect with over 15 years of experience building high-throughput **Python microservices**, relational data systems, and cloud-native platforms on **AWS**. Deep expertise in **PostgreSQL**, **Redis**, **SQL optimization**, and event-driven architectures using **FastAPI**, **Django**, and **Flask**. Proven track record delivering reliable backend systems for e-commerce, financial reporting, and consumer-facing products—processing millions of daily transactions with strict uptime and data integrity requirements. Collaborative Agile leader experienced in cross-functional delivery, code review culture, and mentoring engineers through complex platform migrations.

Core Competencies & Technical Skills

- **Languages & Frameworks:** Python (FastAPI, Django, Flask, Asyncio, Sanic), SQL, JavaScript, Bash/Zsh
- **Cloud & DevOps:** AWS (ECS, Fargate, Lambda, RDS, S3), Docker, Kubernetes, CI/CD (GitHub Actions, GitLab CI), Linux Administration
- **Backend & Architecture:** Microservices, RESTful APIs, Event-Driven Architecture, Distributed Systems, High-Concurrency Design
- **Data & Integration:** ETL Pipelines, Apache Airflow, AWS Pub/Sub Messaging, External API Integrations
- **Databases & Caching:** PostgreSQL, MySQL, Redis, SQLAlchemy, Schema Design, Query Optimization & Indexing
- **Engineering Practices:** pytest, Agile/Scrum, Code Reviews, Performance Tuning, Security Hardening, Git

Key Accomplishments

- Engineered event-driven ETL pipelines on AWS ECS, Fargate, and Airflow, processing **2.5M+ daily transactions** across PostgreSQL, Redis, and external APIs with **99.95% accuracy**.
- Architected containerized Python microservices on AWS, increasing system throughput by **45%** and reducing API latency to under **120ms**.
- Co-architected an automated financial costing system at Disney, cutting end-of-month reconciliation from **8 hours to 45 minutes** while maintaining **100% data integrity**.
- Automated B2B e-commerce order fulfillment workflows compliant with ASC X12 EDI standards, reducing manual backend processing by **90%**.
- Refactored legacy monolithic services into distributed Python microservices, achieving **99.99% system availability** and improved integration test speed by **50%**.

Professional Experience

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present

Los Angeles, CA / Remote

CGJSoftware, Inc.

- Architect and deploy containerized Python backend services (FastAPI, Django, Sanic) on AWS ECS/Fargate and Docker for e-commerce, healthcare, and data platform clients.
- Design PostgreSQL schemas, Redis caching layers, and SQL optimization strategies supporting high-concurrency API workloads.
- Build event-driven data pipelines and third-party API integrations, automating document classification and reducing manual processing time by **60%**.
- Lead code reviews, CI/CD improvements, and cross-functional delivery planning for distributed engineering teams.

Senior Software Engineer

May 2023 – July 2023

CVS, Inc. — (100% Remote)

- Decoupled legacy monolithic backend systems into modular microservices deployed via Docker and Docker Compose.
- Improved localized integration testing speed by **50%** and advised leadership on domain-driven design to reduce inter-service dependencies.

Senior Software Engineer

October 2021 – November 2022

Disney Corporation, Inc. — (100% Remote)

- Built scalable backend modules for enterprise financial and reporting systems processing **\$10M+ in daily transaction metrics**.
- Optimized PostgreSQL interfaces and cloud infrastructure on AWS, achieving **99.99% uptime** across critical reporting applications.

Python Software Developer and System Architect

July 2019 – October 2021

CGJSoftware, Inc. — (100% Remote)

- Delivered customized cloud backend architectures using Python, Docker, and GCP/AWS, improving deployment frequency by **3x**.
- Designed asynchronous messaging architectures with AWS Pub/Sub and Boto3, ensuring **zero data loss** during peak traffic.

Software Developer and Scrum Master

April 2014 – August 2015

KeyIngredient — Austin, TX

- Implemented core e-commerce backend REST APIs on Google App Engine and automated B2B order fulfillment pipelines.
 - Led Scrum ceremonies, peer code reviews, and backend validation workflows for consumer recipe and shopping data platforms.
-

Field Wireman & Communications Specialist

September 1995 – September 1999

United States Marine Corps — San Diego, CA & Overseas

- Deployed and maintained high-availability tactical communications networks under strict operational uptime requirements.

Education & Certifications

Associate of Science : Computer Electronics

2010 to 2013

ITT Technical Institute — San Diego, CA

- Associate of Science in Computer and Electronics Engineering Technology (GPA 3.67)
