

Cary Jones

Senior Software Engineer | Distributed Systems, Data Pipelines & High-Scale Platforms

Temple City, CA 91780 (626) 272-2567 cgjonesdev@gmail.com linkedin.com/in/cary-g-jones

SUMMARY

Senior Software Engineer with 15+ years building production systems optimized for **high throughput, low latency, and reliability**. Deep experience architecting **distributed services**, near-real-time **data pipelines**, and cloud infrastructure on **AWS** using **Docker**, event-driven messaging, and rigorous observability practices. Strong **SQL and relational database** expertise with a data-driven approach to technical and product trade-offs. Collaborative engineer who owns features from design through deployment, leads cross-functional delivery, and mentors teams through complex platform modernization.

CORE COMPETENCIES

- **Distributed Systems:** High-concurrency microservices, event-driven architecture, low-latency API design, fault tolerance, performance tuning
- **Data & Analytics Platforms:** ETL/near-real-time pipelines, Apache Airflow, SQL optimization, PostgreSQL, MySQL, Redis, schema design
- **Cloud & Infrastructure:** AWS (ECS, Fargate, Lambda, RDS, S3, Pub/Sub), Docker, Kubernetes, CI/CD, Linux, production observability
- **Languages:** Python (FastAPI, Django, Flask), SQL, Java (unit/integration testing), Go, JavaScript, Bash
- **Engineering Practices:** Full SDLC ownership, cross-team collaboration, code review, Agile/Scrum leadership, pytest, Git

SELECTED IMPACT

- Engineered event-driven ETL pipelines on AWS ECS, Fargate, and Airflow processing **2.5M+ daily transactions** with **99.95% accuracy**.
- Architected containerized microservices on AWS, increasing throughput by **45%** and reducing API latency to under **120ms**.
- Built enterprise financial backend modules processing **\$10M+ in daily transaction metrics** with **99.99% uptime** on AWS.
- Co-architected automated reconciliation systems, cutting end-of-month batch processing from **8 hours to 45 minutes**.
- Refactored monolithic services into distributed architectures, improving integration test speed by **50%** and system availability to **99.99%**.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Design and deliver pragmatic, production-ready backend solutions for enterprise clients across data-intensive domains, owning architecture through deployment.
 - Build high-performance distributed services and data pipelines on AWS with Docker, optimizing for reliability, latency, and operational visibility.
 - Collaborate with cross-functional stakeholders to translate business requirements into scalable SQL schemas, API contracts, and pipeline controls.
 - Lead code reviews and CI/CD improvements, continuously improving system quality and delivery predictability.
-

Senior Software Engineer

May 2023 – July 2023 | CVS, Inc. (Remote)

- Decoupled legacy monolithic systems into modular, containerized microservices with improved testability and deployment isolation.
 - Advised engineering leadership on domain-driven design patterns to reduce coupling across high-traffic backend modules.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered scalable backend modules for enterprise financial and reporting systems with strict data integrity and availability requirements.
 - Optimized PostgreSQL interfaces and AWS-hosted reporting infrastructure, achieving **99.99% uptime** for mission-critical workloads.
 - Developed high-performance Python database layers and **Java unit test suites** supporting large-scale system migration with **100% data integrity**.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Designed asynchronous, event-driven architectures using AWS Pub/Sub messaging, ensuring **zero data loss** during peak load windows.
 - Optimized complex SQL workloads for AWS Redshift reporting, improving query performance by **38%**.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure REST APIs and relational data models supporting **500k+ active user profiles** with HIPAA-compliant controls.
 - Managed cross-functional engineering delivery as Scrum Master, establishing CI/CD guardrails and production release discipline.
-

Field Wireman & Communications Specialist

September 1995 – September 1999 | United States Marine Corps

- Deployed and maintained high-availability communications systems under strict operational uptime requirements.

EDUCATION

Associate of Science, Computer Electronics

2010 – 2013 | ITT Technical Institute, San Diego, CA (GPA 3.67)
