Media Platform Engineering Team

Paramount (via LTIM)

Los Angeles, CA

Re: Sr. AWS Python Developer — Media & Entertainment

Dear Hiring Team,

I am writing to express my strong interest in the Sr. AWS Python Developer role supporting Paramount's Media Platform. With over 15 years of production Python and AWS experience — including direct **Media & Entertainment** engineering work at **Disney** — I am excited to contribute scalable, well-tested backend systems that power high-performance media platform operations. Based in Temple City, I am available for the **Los Angeles onsite** requirement and would welcome the opportunity to join Paramount's engineering team.

My background aligns closely with this role's core requirements:

- **Python & AWS at scale:** I have extensive production experience building serverless and containerized systems on **AWS Lambda, ECS, Fargate, S3, and RDS**, designing event-driven architectures with message queues and topics for high availability and performance.
- **Media domain experience:** At Disney, I engineered backend modules for enterprise media and financial reporting platforms, optimizing PostgreSQL workloads and AWS infrastructure to achieve **99.99% uptime** on mission-critical systems.
- **Quality & CI/CD discipline:** I write well-structured, reusable, test-covered Python code and enforce Git, unit testing, and CI/CD best practices (GitHub Actions, GitLab CI) across teams I lead.
- **AI-assisted engineering:** I am highly proficient with **Cursor, Claude Code, and GitHub Copilot**, and have deployed production LLM integrations using LangChain and vector databases — matching the role's emphasis on modern AI development tooling.

I thrive in Agile environments — contributing in standups, planning, estimating, and demos — and I prioritize clear documentation so teammates can learn from and extend the systems I build. I am comfortable managing individual priorities and deadlines while staying aligned with broader team deliverables.

As an honorably discharged U.S. Marine Corps veteran, I bring disciplined ownership and strong communication skills to every project. I would welcome the opportunity to discuss how my AWS Python expertise, Disney media platform background, and AI-augmented development practices can support Paramount's Media Platform team.

Thank you for your time and consideration.

Sincerely,

Cary Jones

Sr. AWS Python Developer
