SUMMARY

Senior AWS Python Developer with 15+ years building **highly scalable, high-performance, and highly available** production systems for media, financial, and enterprise platforms. Expert in **Python, AWS Lambda, ECS/Fargate**, event-driven architectures, and **PostgreSQL/NoSQL** data layers. Proven experience in the **Media & Entertainment** domain at Disney, delivering backend services with strict reliability and data integrity requirements. Early adopter of **AI-assisted development** (Cursor, Claude Code, GitHub Copilot) and production LLM integrations (LangChain, vector databases). Strong CI/CD, unit testing, and Agile delivery practices.

TECHNICAL SKILLS

- **Python & AWS:** Python 3 (FastAPI, Django, Flask, Asyncio), AWS Lambda, ECS, Fargate, S3, RDS, Pub/Sub messaging, serverless and containerized compute
- **Architecture:** Event-driven systems, message queues/topics, microservices, design patterns, RESTful APIs, high-availability platform design
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, SQL optimization, NoSQL data modeling
- **DevOps & Quality:** Docker, Kubernetes, GitHub Actions, GitLab CI, pytest, unit/integration testing, CI/CD, Git
- **AI Engineering:** Cursor, Claude Code, GitHub Copilot, LangChain, OpenAI/Anthropic APIs, RAG, vector databases (Pinecone, ChromaDB)
- **Methodologies:** Agile/Scrum, technical documentation, code review, cross-functional collaboration

KEY ACCOMPLISHMENTS

- Built AWS-based event-driven ETL pipelines (ECS, Fargate, Airflow) processing **2.5M+ daily transactions** with **99.95% accuracy**.
- Delivered scalable backend modules at Disney for enterprise media/financial systems processing **\$10M+ in daily metrics** with **99.99% uptime**.
- Integrated AI coding tools (Cursor, Copilot, Claude) into engineering workflows, increasing feature delivery speed by **35–40%** while raising test coverage from **65% to 92%**.
- Architected containerized Python microservices on AWS, improving throughput by **45%** and reducing API latency to under **120ms**.
- Deployed production LLM/RAG systems with vector search, reducing manual data processing time by **60%**.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Develop and maintain scalable Python backend services on AWS (Lambda, ECS, Fargate, S3, RDS) with reusable, well-tested, production-ready code.
 - Design event-driven architectures using AWS messaging and asynchronous Python patterns for high-concurrency workloads.
 - Integrate LLM capabilities (LangChain, vector databases) into client data pipelines and document solutions for team reuse.
 - Own CI/CD workflows, source control standards, and code review practices across distributed engineering teams.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Engineered scalable backend modules for enterprise media and financial reporting systems in the **Media & Entertainment** domain.
 - Optimized PostgreSQL interfaces and AWS cloud infrastructure, achieving **99.99% uptime** for mission-critical reporting applications.
 - Co-architected automated costing systems, reducing batch processing from **8 hours to 45 minutes** with **100% data integrity**.
 - Created high-performance Python database layers and Java unit test suites supporting large-scale platform migration.
-

Senior Software Engineer

May 2023 – July 2023 | CVS, Inc. (Remote)

- Decoupled legacy monolithic systems into containerized microservices, improving integration testing speed by **50%**.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Designed event-driven architectures with AWS Pub/Sub messaging, ensuring **zero data loss** during peak traffic.
 - Containerized Python applications with Docker and deployed to AWS/GCP, improving deployment frequency by **3x**.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Built secure REST APIs and relational data models supporting **500k+ active users**; established CI/CD pre-deploy automation.
-

Field Wireman & Communications Specialist

September 1995 – September 1999 | United States Marine Corps

- Maintained high-availability communications systems under strict operational uptime requirements.

EDUCATION

Associate of Science, Computer Electronics

2010 – 2013 | ITT Technical Institute, San Diego, CA (GPA 3.67)

- Equivalent professional experience: 15+ years production software engineering
