SUMMARY

Senior Full Stack Developer with 15+ years building scalable backend services and integrated applications in **Python, AWS serverless and container platforms**, and modern JavaScript stacks. Deep experience in **event-driven architectures**, regulated environments (HIPAA healthcare, enterprise financial systems), and production LLM/AI tooling integration. Early adopter and team evangelist for **agentic AI development** (Cursor, Claude Code, GitHub Copilot) — delivering measurable productivity gains while enforcing code quality, security review, and IP-safe workflows. Proven technical leader across the full SDLC: design, implementation, CI/CD, monitoring, and mentorship.

CORE COMPETENCIES

- **Python & Backend:** FastAPI, Django, Flask, Asyncio, RESTful APIs, microservices, pytest, rigorous code review practices
- **AWS Serverless & Cloud:** Lambda, API Gateway, ECS, Fargate, S3, RDS, SQS/Pub-Sub messaging, event-driven pipelines, Docker, Kubernetes
- **Event-Driven Architecture:** Message queues, idempotent processing, eventual consistency patterns, Apache Airflow ETL, high-volume transaction pipelines
- **Full Stack:** JavaScript, Node.js, React.js, HTML/CSS, API integration, containerized full-stack deployments (Python/React/Node)
- **AI-Augmented Engineering:** Cursor, Claude Code, GitHub Copilot, LangChain, RAG, vector databases; productivity, security, and quality guardrails
- **Regulated & DevOps:** HIPAA-compliant systems, CI/CD (GitHub Actions, GitLab CI), observability, secure coding, Agile/Scrum leadership

KEY IMPACT

- Integrated AI coding tools into engineering workflows, accelerating feature delivery by **35–40%** while raising test coverage from **65% to 92%**.
- Engineered AWS event-driven ETL pipelines (ECS, Fargate, Airflow) processing **2.5M+ daily transactions** with **99.95% accuracy** and reliable retry semantics.
- Architected HIPAA-compliant REST APIs serving **500k+ active user profiles** with strict access controls and CI/CD pre-deploy validation.
- Deployed serverless and containerized Python services on AWS, improving throughput by **45%** and reducing API latency below **120ms**.
- Containerized Python, React, and Node.js applications, improving deployment frequency by **3x** across client platforms.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Lead design and delivery of Python backend services on AWS (Lambda, ECS, Fargate) for healthcare, e-commerce, and data platform clients.
 - Architect event-driven data pipelines with message-based processing, output validation, and idempotent workflow design.
 - Pioneer AI-augmented development practices — Cursor, Claude, Copilot — with enforced peer review, security standards, and measurable velocity gains.
 - Mentor engineers, drive code reviews, and translate product requirements into shippable technical designs.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure Python REST APIs for **HIPAA-compliant healthcare** platforms in a regulated, audit-sensitive environment.
 - Established CI/CD pre-deploy automation, production monitoring, and cross-functional Agile delivery as Scrum Master.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Built scalable backend modules for enterprise **financial services** reporting with **99.99% uptime** on AWS.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Designed asynchronous event-driven architectures using AWS Pub/Sub messaging, ensuring **zero data loss** during peak loads.
 - Containerized Python, React, and Node.js applications; deployed to GCP/AWS with **3x** deployment frequency improvement.
-

Senior Software Engineer

May 2023 – July 2023 | CVS, Inc. (Remote)

- Modernized legacy monoliths into modular microservices with Docker, improving integration testing speed by **50%**.
-

Field Wireman & Communications Specialist

September 1995 – September 1999 | United States Marine Corps

- Delivered mission-critical systems with disciplined ownership and accountable production support.

EDUCATION

Associate of Science, Computer Electronics

2010 – 2013 | ITT Technical Institute, San Diego, CA (GPA 3.67)
