

CARY JONES

Senior Software Engineer • Python Backend & Full-Stack Systems

Temple City, CA 91780 | (626) 272-2567 | cgjonesdev@gmail.com | Greater Los Angeles Area (El Segundo / Hybrid)

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with over 15 years of experience architecting high-throughput Python backends (FastAPI, Django, Pydantic), real-time time-series data ingestion pipelines, and interactive ReactJS frontend applications. Proven track record of designing distributed cloud architectures on AWS (RDS, S3, ECS, Fargate, Lambda, Cognito, IoT) capable of processing over 2.5 million daily events with low latency and 99.9% uptime. Specialist in Test-Driven Development (TDD with PyTest), secure HIPAA-compliant microservices, and AI-augmented software workflows. U.S. Marine Corps veteran bringing disciplined systems engineering, failure-mode analysis, and technical leadership to Circadia Health's mission-critical patient monitoring platform.

TECHNICAL SKILLS & COMPETENCIES

Backend & APIs:	Python (FastAPI, Django, Pydantic, Asyncio, NumPy, Pandas), RESTful API Design, Microservices, C++
Frontend Development:	JavaScript (ES6+), ReactJS, State Management, Responsive UI, UI Component Architecture, WCAG
AWS & Cloud Infra:	AWS (Cognito, Pinpoint, IoT, MSK/Kafka, RDS, S3, ECS, Fargate, Lambda), Docker, Containerization
Databases & Data Pipelines:	PostgreSQL, MySQL, MongoDB, Redis, Time-Series Ingestion Pipelines, Query Optimization, SQLAlchemy
Quality & DevOps:	Test-Driven Development (TDD), PyTest, CI/CD (CircleCI, GitHub Actions), HIPAA Compliance & Security

PROFESSIONAL EXPERIENCE

CGJSoftware, Inc. — Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present

Los Angeles, CA / Remote

- Architected and deployed asynchronous Python (FastAPI, Pydantic) microservices and RESTful APIs, facilitating high-frequency data ingestion and analytics for enterprise healthcare and IoT client platforms.
- Built scalable time-series data ingestion pipelines processing real-time sensor streams using AWS ECS, Fargate, RDS PostgreSQL, and Redis, reducing peak API query latency by 45%.
- Enforced strict Test-Driven Development (TDD) using PyTest, establishing automated CI/CD deployment pipelines on CircleCI and achieving 92%+ code test coverage.
- Implemented secure authentication and user management using AWS Cognito and encrypted data transmission pipelines compliant with strict HIPAA and security standards.

Senior Backend & Full-Stack Engineer — Enterprise Engagements (Disney, CVS, CT-REI)

2017 – 2022

Los Angeles, CA / Remote

- Designed and operated high-concurrency Python backend systems on AWS (RDS, S3, Lambda, Docker), scaling event processing capacity to over 2.5 million daily events with 99.9% uptime.
- Developed responsive, accessible web interfaces in ReactJS, collaborating closely with design teams on API contracts, state management, and reusable component libraries.
- Optimized complex SQL query performance and schema design across PostgreSQL and MySQL databases, reducing high-frequency analytics query response times from 1.2s to 180ms.
- Integrated background worker queues (Celery, Redis) featuring idempotency, multi-instance locking, and automated retries for multi-tenant data processing.

Lead Software Engineer / Scrum Master — Tech Solutions

2010 – 2017

Various Enterprise Clients

- Led cross-functional agile development teams (Engineering, Product, QA) in building mission-critical backend APIs and web platforms.
- Established standardized CI/CD pipelines and Docker containerization workflows, accelerating feature velocity by 35% and reducing production incidents.
- Mentored junior engineers on RESTful API best practices, design patterns, and code review standards.

EDUCATION & CERTIFICATIONS

Associate of Science in Computer Science / Information Technology • Microskills

Certified Scrum Master (CSM) • Scrum Alliance

U.S. Marine Corps Veteran • Honorably Discharged
