SUMMARY

Platform-minded Senior Software Engineer with 15+ years building the paved roads other teams ship on — **AWS cloud infrastructure**, **PostgreSQL** at scale, **event-driven pipelines**, CI/CD, and production observability. I code infrastructure and platform tooling (Python, shell, IaC patterns), own services end-to-end from design through on-call, and care about reliability without unnecessary complexity. Experienced hardening regulated data paths (HIPAA), automating deploy/release workflows, and improving developer velocity through guardrails, not gatekeeping.

CORE COMPETENCIES

Platform & SRE: AWS (ECS, Fargate, Lambda, RDS, S3), Docker, Kubernetes exposure, GitHub Actions CI/CD, canary-style releases, SLO-minded monitoring (CloudWatch), incident triage, runbooks, on-call ownership

Data & Backend: Python, FastAPI, Django, PostgreSQL, Redis, SQL optimization, event-driven architecture, idempotent processing, circuit-breaker/retry patterns, REST & service integrations

Security & Reliability: HIPAA-compliant systems, OAuth2, encryption, audit-friendly access patterns, data privacy guardrails, regulated device verification (Hospira)

Engineering Culture: Async written communication, end-to-end project ownership, mentoring, AI-augmented development (Cursor, Copilot) with strong review standards

KEY IMPACT

- Engineered **event-driven pipelines** on AWS ECS/Fargate processing **2.5M+ daily transactions** at **99.95% accuracy** — explicit schemas, reconciliation, and observability across PostgreSQL, Redis, and external APIs.
- Maintained **99.99% uptime** on AWS-hosted enterprise backends at Disney; co-architected financial reconciliation cutting processing from 8 hours to 45 minutes.
- Built CI/CD and deployment automation (GitHub Actions, containerized services) improving release frequency **3x** while reducing merge conflicts by **70%** through branching standards and pre-deploy validation.
- Architected **HIPAA-compliant Python REST APIs** serving **500k+ profiles** with secure partner data access, audit trails, and **99.9% availability**.
- Integrated AI coding tools into platform workflows, expanding automated test coverage from **65% to 92%** without compromising production review gates.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Own **AWS platform architecture** for client backends — ECS/Fargate services, RDS PostgreSQL, Lambda integrations, CloudWatch telemetry, and GitHub Actions CI/CD.
 - Built event-driven microservices and REST APIs with sub-**120ms** latency; designed retry/circuit-breaker patterns for external service dependencies.
 - Delivered infrastructure-as-code patterns, containerized deployments, and developer tooling that reduced incident recovery time and improved release confidence.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Owned production Python services on AWS at **99.99% uptime**; triaged distributed-system incidents and implemented durable root-cause fixes.
 - Optimized **PostgreSQL** interfaces and migration workflows ensuring **100% data integrity** during large-scale reconciliation.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure platform APIs and data models for **HIPAA-compliant** healthcare systems; implemented privacy guardrails and audit-friendly access controls.
 - Configured production Linux environments, SSL/TLS, automated backups, and CI/CD pre-deploy scripts for **99.9% availability**.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Containerized Python/Node.js applications with Docker; deployed to GCP and AWS with non-blocking **Pub/Sub** architectures ensuring **zero data loss** at peak load.
 - Optimized SQL and data warehouse queries (+38% performance); built observability into async processing pipelines.
-

Quality Assurance & Network Integration Engineer

February 2005 – December 2009 | Hospira, Inc., San Diego, CA

- Five years in regulated healthcare — formal verification, audit trails, enterprise wireless security architecture, and hospital network integration for medical device software.
-

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
