SUMMARY

Senior Backend Engineer with 15+ years building scalable, well-tested **Python** services on **AWS** — from design through production monitoring. Deep experience in health-adjacent domains: **HIPAA-compliant platforms**, regulated medical device verification, and privacy-conscious data handling. Pragmatic owner who reduces ambiguous problems into clear solutions, automates repetitive work, and balances delivery speed with long-term maintainability. Comfortable collaborating asynchronously across time zones.

CORE COMPETENCIES

Python Backend: FastAPI, Django, Flask, asyncio, REST APIs, microservices, pytest, maintainable/testable code, design patterns, CS fundamentals

Cloud & Scale: AWS (ECS, Fargate, Lambda, RDS, S3), Docker, GitHub Actions CI/CD, highly available web services, query optimization, PostgreSQL, Redis

Health & Privacy: HIPAA-compliant systems, regulated environments (Hospira), security/privacy standards, audit support, OAuth2, encryption

Data Pipelines: Event-driven ETL, explicit schemas, idempotent processing, reconciliation, observability, 2.5M+ daily transaction throughput

KEY IMPACT

- Engineered **Python event-driven pipelines** on AWS handling **2.5M+ daily transactions** at **99.95% accuracy** with monitoring, documentation, and automated test coverage.
- Architected **HIPAA-compliant Python REST APIs** (FastAPI/Django) serving **500k+ active user profiles** — readiness-style member data workflows with privacy guardrails.
- Maintained **99.99% uptime** on AWS-hosted production backends; owned solutions from design through on-call incident response.
- Expanded automated test coverage from **65% to 92%** using AI-augmented development while preserving code review standards.
- Five years in **regulated healthcare** at Hospira — formal verification, audit trails, and security-conscious integration for medical device software.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Own **Python backend solutions** end-to-end — FastAPI/Django services on AWS ECS/Fargate with testing, CloudWatch monitoring, and CI/CD documentation.
 - Drive architectural improvements for scalability and new product capabilities; reduce ambiguous client requirements into actionable technical plans.
 - Collaborate asynchronously with distributed stakeholders across healthcare and e-commerce domains.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure **Python REST APIs** for **HIPAA-compliant** health platforms serving **500k+ profiles**; ensured privacy and regulatory standards in production.
 - Designed scalable PostgreSQL schemas; implemented OAuth2, audit-friendly access, and **99.9% availability**.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Built production Python modules and PostgreSQL interfaces on AWS; ensured **100% data integrity** during large-scale migrations.
 - Owned on-call for distributed backend services at **99.99% uptime**.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Deployed containerized Python apps to AWS/GCP; optimized SQL queries (+38% performance) and built async messaging architectures with zero data loss at peak load.
-

Quality Assurance & Network Integration Engineer

February 2005 – December 2009 | Hospira, Inc., San Diego, CA

- Regulated healthcare environment — requirements-based verification, audit documentation, hospital network integration, and security testing for infusion pump software.
-

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
