SUMMARY

Senior Backend Engineer with 15+ years designing **cloud-native, event-driven systems** on **AWS** — APIs, microservices, and production integrations in healthcare and enterprise environments. Deep strength in system design, architectural tradeoffs, distributed troubleshooting, and building software that stays maintainable in production. Experienced with **Lambda, SQS/SNS-style messaging**, PostgreSQL, and observability; comfortable mentoring engineers and owning services end-to-end from design through on-call.

CORE COMPETENCIES

Backend & Architecture: Python, FastAPI, Django, Node.js, TypeScript, REST APIs, microservices, system design, event-driven architecture, idempotent/async processing, service integrations

AWS Cloud-Native: ECS, Fargate, Lambda, RDS, S3, Pub/Sub messaging, DynamoDB-adjacent patterns, CloudWatch monitoring, Docker, CI/CD (GitHub Actions)

Healthcare & Production: HIPAA-compliant platforms (500k+ profiles), regulated device verification (Hospira), audit trails, reliability at 99.9%+ uptime, incident triage

Data & Search: PostgreSQL, Redis, SQL optimization, ETL pipelines (2.5M+ daily transactions), reconciliation, observability

KEY IMPACT

- Engineered **event-driven pipelines** on AWS ECS/Fargate handling **2.5M+ daily transactions** at **99.95% accuracy** with async processing, explicit schemas, and CloudWatch observability.
- Architected **HIPAA-compliant Python REST APIs** for healthcare platforms serving **500k+ active user profiles** — patient-engagement-style workflows and secure partner integrations.
- Built non-blocking **AWS Pub/Sub** architectures with Boto3 ensuring **zero data loss** during peak loads; containerized services deployed via Docker.
- Maintained **99.99% uptime** on AWS-hosted enterprise backends; triaged production incidents across distributed services with root-cause follow-through.
- Containerized Python and Node.js applications, improving deployment frequency **3x** and API latency to sub-**120ms**.

PROFESSIONAL EXPERIENCE

Principal Software Engineering Consultant / Technical Lead

Jan 2023 – Present | Los Angeles, CA / Remote

CGJSoftware, Inc.

- Design scalable **backend services and APIs** on AWS for healthcare and e-commerce clients — event-driven workflows, service-to-service integrations, and CloudWatch telemetry.
 - Lead architecture discussions on reliability, scalability, and maintainability; mentor engineers on production best practices.
 - Build Python microservices (FastAPI, Django) and Node.js integrations; own CI/CD and containerized deployments.
-

API Developer, System Architect, DevOps Engineer, and Scrum Master

January 2018 – July 2019 | Alan Health & Science Corp. (Remote)

- Architected secure **Python REST APIs** for **HIPAA-compliant** healthcare platforms serving **500k+ profiles** — member workflows, OAuth2, and partner data access.
 - Established CI/CD, production Linux environments, and automated monitoring for **99.9% availability**.
-

Senior Software Engineer

October 2021 – November 2022 | Disney Corporation, Inc. (Remote)

- Owned production backend services on AWS; debugged distributed-system incidents and implemented durable fixes at **99.99% uptime**.
 - Built high-performance PostgreSQL interfaces ensuring **100% data integrity** during migration and reconciliation.
-

Python Software Developer and System Architect

July 2019 – October 2021 | CGJSoftware, Inc. (Remote)

- Designed asynchronous **AWS messaging** architectures; deployed containerized Python/Node.js apps to GCP and AWS.
-

Quality Assurance & Network Integration Engineer

February 2005 – December 2009 | Hospira, Inc., San Diego, CA

- Five years in **regulated healthcare** — requirements verification, audit trails, hospital network integration, and production-quality rigor for medical device software.

EDUCATION

Associate of Science, Computer Electronics

ITT Technical Institute — GPA 3.67

United States Marine Corps

Field Wireman & Communications Specialist — Honorably Discharged
